

Pre-K - Grade 12 ASD Technology and Innovation Mission

The American School of Doha Technology and Innovation Team will support the intellectual and personal development of our students and teachers, inspiring and empowering them to become positive, active, global citizens.

ASD Technology and Innovation Vision

ASD is a future-focused community where learning is...

- Collaborative
- Fun and engaging
- Extended beyond walls
- Creative to foster innovation
- Sustained by responsible practices
- Data-informed and evidence based
- Authentic, solving real-world problems
- Encouraged in a technology-enhanced environment

ASD technology and innovation is...where students and teachers are encouraged to extend their own learning.

Essential Agreements for Technology and Innovation

Through the use of technology, ASD Technology and Innovation teachers will:

Help students and teachers extend their own learning.

Articulate, teach and assess a PK-12 standards based technology curriculum.

Provide opportunities for students and teachers to be creative and innovative.

Provide avenues for collaboration.

Model and help students and teachers learn ethical use of technology and what it means to be a Positive, active digital citizen.

Help students and teachers learn through authentic, real-world problem solving.

Help students and teachers understand how to be informed by data and how to base their Learning or teaching on credible evidence.

Promote learning that is fun and engaging.
